

Nicole Tremblett
Vice President, Information Technology Group
HCA Healthcare

Experienced technology executive with proven track record of leading teams from strategy through solution delivery to achieve desired business outcomes. Focused on accelerating outcomes by setting a clear strategy, vision and goals. Demonstrated ability in building talent and cultivating an engaged workplace.

Currently lead a team of over 1300 IT professionals focused on building world class IT shared services and products to improve the delivery of healthcare. Current responsibilities include Infrastructure (cloud adoption, data center operations, network service, end user compute), Shared Services (service management, project management, testing services, business analysis) and Nursing Technology (mobile management, nurse call).

Previously lead a team that designed and delivered technology solutions to operate revenue cycle services for a large healthcare provider. Supported Shared Services Center operations in 11 locations. Defined and executed strategic initiatives by developing plans for new products, streamlining operations and investing in future strategies.

As a potential member of the board I look forward to understanding and being an advocate for the current strategic objectives of the organization. I also look forward to partnering to develop the strategic vision for the next three to five years. I will be an active participant in all activities related to furthering the mission of X12.

Thank you for your consideration.

Nicole Tremblett
